

*a University and carry the former into the latter" and this they did, without seeming to perceive by doing so, they bring the charters of 1807 and 1812 in collision, contrary to the opinion of the court, which says, they are not inconsistent and exhibit themselves, hereby, contradicting the dictum of the court which furnishes the foundation of their claim.*

Impressed with the belief therefore, that the important questions involved in this controversy can only be satisfactorily adjusted by the courts, and concurring in the opinion, that the litigation should be terminated as speedily practicable, we recommend as the the most appropriate means of giving quietude and repose to the Institution, that a quo warranto should be issued against the Regents, under the charter of 1807, and a similar proceeding against the Regents of 1812, and that provision should be made for a full and speedy trial.

All which is respectfully submitted,

OTHO SCOTT,  
JOHN McPHERSON,  
WM. MATTHEWS.
